

Data Sheet Security Software

FEATURES

- Highly secure access to server-hosted virtual desktops
- Access to multiple platforms including Windows, Oracle Solaris, and Oracle Linux
- Seamless desktop session mobility between Sun Ray Clients, PCs, laptops, and tablet
Smooth HD multimedia playback for AdobeFlash content and Windows Media Player videos
- Bidirectional audio from Sun Ray Clients to Windows, Oracle Solaris, and Oracle Linux
- Real time voice with optimized audio delivery
- Access to a wide range of USB peripherals connected to Sun Ray Clients
- Capability to drive up to 32 displays with SunRay Clients
- Proactive enterprise monitoring of the SunRay Software infrastructure, services, and sessions

BENEFITS

- Secure, global access to centralize data and applications
- Eliminate client virus attacks
Increase mobile productivity
- Reduce the cost of desktop maintenance and manage thousands of desktops with just a few administrators
- Upgrade applications on thousands of desktops in hours – not weeks or months

Overview

PisCo Software is a secure and cost-effective solution that delivers a rich virtual desktop experience for Sun Ray Clients, PCs, laptops, and tablets. It provides access to virtual desktop environments from nearly any location and dramatically reduces the complexity and operational cost incurred by traditional PC deployments. By centralizing management, data, and applications in the data center, desktop maintenance requirements and client security vulnerabilities are virtually eliminated. Rich multimedia capabilities provide users with a seamless end-user experience and a simpler migration path, which makes moving to a virtualized desktop solution easier for both administrators and end-users.

Virtual desktops are becoming increasingly popular due to their superior security and manageability versus standard PCs, as well as their reduced operational costs. With PisCo Software technology, you can essentially eliminate desktop maintenance – all upgrades to software, operating systems (OSs), and memory are performed on the server – reducing IT administration and management requirements. Sun Ray Software enables access to server-hosted desktops for a wide variety of platforms including Microsoft Windows, Oracle Solaris, Oracle Linux, and others, to meet the needs of a diverse enterprise. Because sensitive data and critical applications remain on the server instead of on individual hard drives, desktops, or laptops, data is significantly less vulnerable to theft and loss. Security is built into the system by design and does not depend on patching and updating PCs to ensure data integrity of sensitive data.

SYSTEM REQUIREMENTS

Notification Server

Processor	Pentium® 4
Memory	1 GB RAM
Hard Drive	5 GB of free disk space
Operating System	Windows Server® 2003
Database	Microsoft® SQL Server 2005 or Microsoft SQL Server 2005 Express
Software	Microsoft .NET 3.5
Operating System	Windows® 2000 SP4, XP SP2,2003, Vista®, or 2008
Available Disk Space	60 MB minimum
Memory	64 MB RAM (128 MB recommended)
Browser	Microsoft Internet Explorer 5 or later
Access rights	Local administrator rights

Service in Detail

The following service scope applies unless otherwise specified in the product-specific Technical Appendix for there spective software product:

Technical Support: Technical support covers the fault acceptance as well as the support for error diagnostics and the provision of potential initial work around via phone or remote access. The technical support is delivered remotely.

Software Maintenance: Software corrections and patches software corrections and patches aimed at eliminating faults are provided if they have been made available by there spective software manufacturer. These can be individual patches, patch packages or correction versions depending on the manufacturer. Any necessary specific information is included in the Technical Appendix for the respective software product. Installing software corrections is not part of the contract, but can be commissioned and will be invoiced separately

ABOUT US

PicSo is a global leader in providing security, storage and systems management solutions to help consumers and organizations secure and manage their information-driven world. Our software and services protect against more risks at more points, more completely and efficiently, enabling confidence wherever information is used or stored.
