"Our lead volume has gone way up, but more importantly, our sales volume has doubled. Our closing ratio has gotten better and we attribute much of that to the upgrades delivered by Doracle Group."

John Smith
VP at Doracle Group

Executive Summary

Large capital projects call for considerable logistics planning. Whether it's building a hydroelectric dam, expanding an international airport or installing an offshore wind farm, hundreds of thousands of components go into the process. All this material must be in the right place at the right time. Otherwise, the project risks lengthy delays and significant cost overruns. Reporting is a key component of this process. It brings together a myriad of details, allows insight into massive amounts of data, and is the public representation of an intricate process. That's why the producers of the world's largest project-focused logistics software system knew it was critical to integrate a better, more flexible reporting component into their software offerings.

Challenges

WPA needed a completely new register that would enable it to effectively and accurately record, track, trade, manage and report on carbon emission units. Due to its complexity, the solution had to be bespoke and would draw on extremely scarce domain knowledge aligned with complex, diverse and changing international standards and authorities. The client also had challenging expectations in regard to the solution's scope, flexibility, time frame and end-user experience.

How We Helped You

Once selected, we initiated a multi-stage development that was conducted across four time zones and involved the skills of more than 100 people. Over nearly 36-months of development work the project team exhibited great dedication, excellent communication and the collaborative approach necessary to ensure the client received the best outcome. This included co-locating WPA and Busea staff for critical Project phases. Development addressed more than 1,600 functional requirements. User experience was a major focus area and more than 8,000 test conditions were executed to ensure quality.

About WPA

Praesent eget nunc id diam scelerisque vulputate sed quis turpis. Vestibulum tempor hendrerit pharetra. Maecenas eget cursus justo, vitae hendrerit nunc. Vivamus venenatis orci nulla, et feugiat est consectetur eu. Proin justo leo, pretium non quam quis, venenatis blandit urna. Mauris ante tortor, placerat a commodo sit amet, volutpat at ante.

Maecenas vel tincidunt diam, sit amet convallis nisl. Quisque auctor elit at lacus tempus, non porttitor enim iaculis. Maecenas placerat nunc ligula, nec molestie est vestibulum luctus. Maecenas tellus nunc, sollicitudin nec laoreet ac, tincidunt sit amet orci. Donec posuere viverra enim, sit amet consequat nisi bibendum eget. Duis sodales, felis sit amet ullamcorper gravida, lectus purus pulvinar arcu, eu auctor ante quam ut mauris.

The Results

The end result of this partnership between WPA and Busea delivered an entirely new register that is built around the user who can now access the full-range of processes online.

Praesent at feugiat mi, vel consequat dolor. Donec malesuada, nisi in dapibus ultrices, dui felis imperdiet lorem, at scelerisque lorem est sit amet erat. Fusce interdum metus vitae mattis bibendum. Cras semper neque in ligula ultricies ullamcorper.

About Busea

Busea is a global leader in providing security, storage and systems management solutions to help consumers and organizations secure and manage their information-driven world. Our software and services protect against more risks at more points, more completely and efficiently, enabling confidence wherever information is used or stored.
