

Attack Protection

Nulla at cursus elit. Sed lacinia risus est, ut blandit tellus aliquet at.

Vestibulum ante ipsum primis in faucibus orci luctus et ultrices posuere cubilia Curae; Nulla quis sodales leo.

The Challenge

Supplied by Savsecurity, Sutton and East Surrey Water have deployed a Scout solution to gain a more comprehensive view of network visibility and network access control (NAC) for its 200 employees and 450 endpoints across 25 locations.

Attackers have the upper hand

Our solutions offer visibility and control of your network, allowing you to identify network vulnerabilities, eliminate rogue devices and facilitate delivery of applications and data to any device securely.

Traditional defenses vs. sophisticated attackers

We offer a comprehensive range of professional services based on industry standards and best practice. Our mantra of "Right First Time" and our wealth of experience has proven effective time and time again.

The Solution

We are experts in delivering IT security solutions for network and device visibility, enterprise mobility, application and security intelligence.

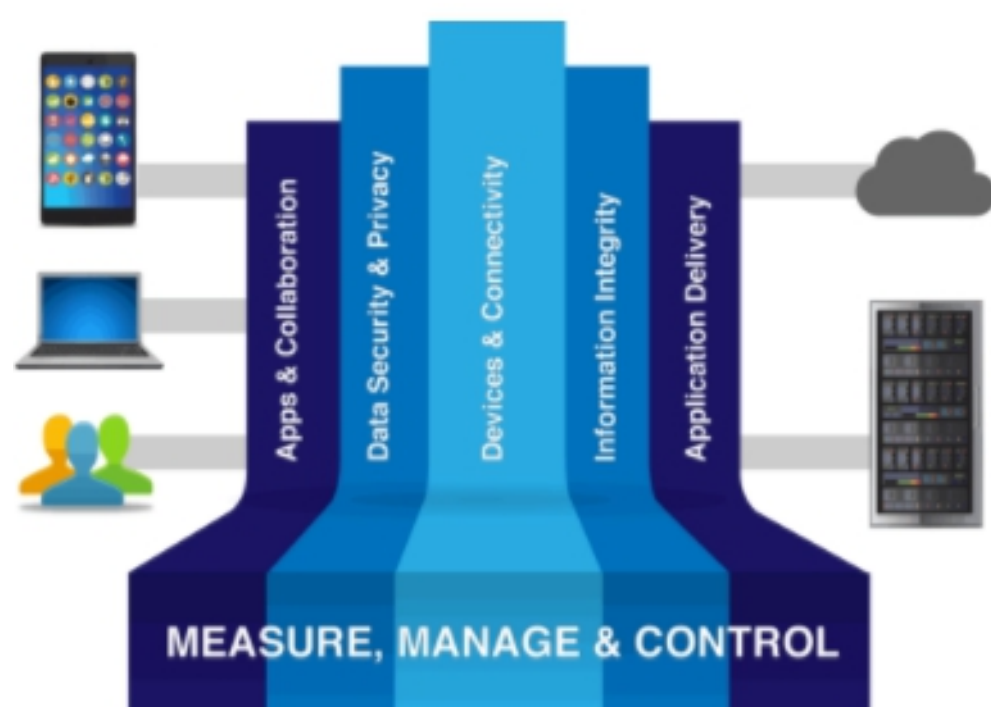

Know and understand what devices are connecting to your network

Securely deliver data and applications to the correct devices

Keep your valuable data from falling in to the wrong hands

Discover all of your APIs

We use our expertise to build world class solutions from our portfolio of technology partners by remaining focused on the needs of our customers and the continually changing security landscape.

Why Savsecurity ?

Savsecurity is an enterprise IT security specialist with a proven track record in delivering complex solutions around mobility, network visibility and secure application & data delivery.

We focus exclusively in these areas and are experts in what we do, offering value for money as well technical know-how.

We are based in a secure technology campus in Hampshire, UK and were established almost a decade ago. Savsecurity is privately owned, growing and profitable. Our approach is based on the use of standards and frameworks.

Protect sensitive data by responding to attacks before a breach occurs
